Wedding Helper App

- Deployed: <https://bearjams.github.io/project1-repo/>
- Code: <https://github.com/Bearjams/project1-repo>
- Role: Head developer of Gift Registry and Couple View pages.
- Description: Prototype application developed with a team. The Wedding Helper will streamline your wedding planning utilizing Etsy and Deezer APIs to simplify registry and DJ playlist process, while sending the couple a nice message and storing the information in a database.
- Language/Tools Used: Built with jQuery and Materialize CSS framework. Incorporates Firebase database for data persistence and AJAX API calls to Etsy and Deezer. **Note: CORS extension required for APIs to work properly.**

Screaming Females Website

- Deployed: <http://screamingfemales.com>
- Role: Developer, Maintenance
- Description: Brand website/webstore which has remained consistently updated and maintained for over 10 years. Has successfully serviced hundreds of thousands of people on a wide range of devices.
- Language/Tools Used: Built with HTML and CSS.
